

HUT8 Pitch

Recommendation: Long

Date: November 16, 2025

Investment Presentation: Devin Capurso & Vincent Hill

- HUT 8 Corp. (HUT) is a **large-scale digital infrastructure company** focused on **Bitcoin Mining, Energy and Data Infrastructure, and High Computing Infrastructure**. With it being a top 5 leader in Bitcoin mining and its ability to work with AI, the future of the company only plans to expand. From being founded in 2017 in Canada to now being headquartered in Florida, HUT8's stock has outperformed predictions and is on track to beat expectations. New **CEO Asher Genoot** was put into position in 2024 and since then direct action has been taken, new growth initiatives have been made leading to an improved balanced sheet for the foreseeable future.

We believe in a long-term holding position at the buying price of \$35.50 with an expected return rate of 82% with a price target of \$64.

HUT8 Corp.	
Price	\$35.50
Market Cap	4.85B
Shares	108.04M
Revenue	184,784M

Investment Thesis Overview

Thesis 1 - A strategic play on Bitcoin Network Growth and Institutional Adoption

- ❖ HUT8 is a **top 5 publicly traded bitcoin mining company** holding (13,696 BTC) Bitcoin in its reserve making its stock directly correlated to the performance of Bitcoin. With the growing institutional interest in **Bitcoin ETF's and corporate Treasuries** it will drive the demand for efficient miners like HUT8 to **gain positional power in the cryptocurrency industry lending institutions Bitcoin** from their reserve backed by loans.
- ❖ With the expansion of **new mining capacity and energy through high-performance hardware (ASICs)**, they've **partnered and own stake in American Bitcoin (ABTC)** to further expand across the US. Their goal is to transfer the responsibility of mining bitcoin to **American Bitcoin Corp (ABTC)** which they've set aside **\$265 million in Bitcoin-backed facilities** and focus on using their cash to create more **data centers and energy/cost sustainability**.

Thesis 2 – The introduction of new data centers platform to run energy to AI

- ❖ Through their expansion have they also begun into next-generation data center and **energy infrastructure**, building platforms capable of powering **artificial intelligence** workloads, **high performance computing**, and future **digital infrastructure**, a growing market with room for significantly higher returns.
- ❖ This diversification strengthens HUT8's revenue and reduces dependency on **Bitcoin and crypto price cycles**.

Thesis 3 - HUT8 Corp. Leading Bitcoin Mining performer in industry while performing sustainability under long term growth

- ❖ They will use their **reusable energy system** through **wind, hydro, and solar power** and computing servers as leverage to expand. In energy incentive industries there are constant growing regulatory pressures to decrease environmental impact.
- ❖ HUT focus on renewable energy that will lead to a more sustainable way to mine Bitcoin and run its data centers. With this clean energy it will provide a strategic advantage for a long-term cost solution over other company's making EPS investors a prime candidate.

Catalysts

- ❖ Cost, demand, and time to mine bitcoin continue to increase. Bitcoin price volatility can directly influence the company's mining margins, asset values, and overall financial stability. Rising Bitcoin Mining Difficulty. (Ex. Bitcoin Halving)

Mispricing & Core Story

- ❖ The Street overlooks Instructure's durability of growth and value of cryptocurrency and mining companies' role on meeting demand. We believe the crypto industry is undervalued for the amount of scalability both bitcoin/cryptocurrency mining and data centers will have in the future.

Revenue Breakdown

Digital Asset Mining

- Digital assets are a huge part of HUT8's revenue breakdown as their main source of revenue is strictly from Bitcoin Mining. When the company chooses to hold BTC the value can easily rise due to the rate of inflation and driving the value of Bitcoin going up. With this they could then eventually use these digital assets for staking or yield farming in the DEFI field, this could then generate more passive income. Trade in their treasury and loan bitcoin to exchanges.

Managed Services

- Hut8's provision of IT infrastructure management and operations for other companies using bitcoin miners for their digital asset's solutions are where their managed services revenue comes from. Holding large scale data centers allows them to provide 3rd parties services to other companies which then allows other companies to use their digital asset infrastructure.

High Performance Computing

- HPC is the use of using high powered computers in order perform high complex task such as AI and blockchain systems. They leverage this to other companies who's in need of large computing resources. Beyond just mining Bitcoin these computers can support blockchain related computing task like decentralized apps and smart contract execution.
- Recently in the past 2 years have been able to almost double revenue without needing to liquidate investors or allocate more shares. They've also expanding by taking a 80% stake in ABTC. That means their growth is coming from what they have been doing.

Revenue Sector	Total Revenue FY 2024
Digital Asset Mining	\$56,602
Manged Services	\$47,482
High Performace Computing	\$80,701
Total Revenue	\$184,785

Increase in Revenue

- Bitcoin to continue to rise in value causing increase of digital assets to the income statement
- Managed services revenue to grow from increase demand of HPC
- High performance revenue to grow due to a expansion of data centers
- Street says the stock is a strong "buy now" opportunity after having a dip in current Q4 with revenue growth dropping but expected to rise
- The average analyst projection predict revenue to go from \$248.4 M this year to \$446.16M next year
- We think these revenue predictions are low, and we predict a bull scenario causing even higher growth in revenue

We predict 2026 full year revenue to hit 620M slightly above the bullish estimates of the analyst

Analyst Estimates	2025 FY	2026 FY
Avg. Estimate	248.4M	446.14M
Low Estimate	220M	316M
High Estimate	279.6M	598.3M

A New Vision for Hut 8: New CEO's Strategy for Market Leadership

Old leadership - CEO Jaime Leverton

- ❖ Bad earnings after 2021 crypto cycle, and no real move forward for the future
- ❖ "Pump-and-dump" allegations came along with JCapital Research failed partnership

Change Needed - Enter CEO Asher Genoot

- ❖ His appointment in 2024
- ❖ New aggressive initiatives, aiming to optimize both operational efficiency and financial strength

Future Plan for Hut 8 – Expansion

- ❖ Stake in American Bitcoin Corp (ABTC)
- ❖ Construct new data centers with better hardware across the US
- ❖ More than bitcoin mining but for AI energy. HPC, and other needs

"Net income of ABTC rose to \$3.47 million 20% owned by Donald Trump Jr. and Eric Trump rose to \$3.47 million, a turnaround from a \$576,000 loss the year before, and revenue surged fivefold to \$64.2 million according to their SEC Filing" - CoinDesk

Background of Asher Genoot:

Before his promotion was the president and a member of the company's board of directors. He's a business executive in the cryptocurrency / digital-infrastructure sector.

Co-founded US Bitcoin Corp. (sometimes referred to as US Data Mining Group, Inc.), a private bitcoin-mining company focused on building and operating data centers, with a multi-hundred-megawatt (MW) portfolio across states.

- ❖ We believe that Genoot is positioning Hut 8 to not only recover from past mistakes but to thrive in the future.
- ❖ AI and high-performance computing ensures that Hut 8 is no longer solely reliant on Bitcoin mining, which makes it much more resilient to market fluctuations.

Competitive Landscape

Other Bitcoin Mining Companies:

BIT DIGITAL

- ❖ HUT8 is a top performer in Bitcoin Mining and is constantly climbing
- ❖ Data Centers & HPC continue to show importance in top companies
- ❖ Partnership in digital asset mining could lead to a bigger future

Data Center & HPC Competitors:

ORACLE®

Thesis 1

HUT8 is a top 5 publicly traded bitcoin mining company holding (13,696 BTC).

- ❖ Growing institutional interest in Bitcoin ETF's and cooperate Treasuries it will drive the demand for efficient miners like HUT8 to gain positional power in the cryptocurrency industry lending institutions Bitcoin from their reserve backed by loans.

BTC Growth – With the growth of Bitcoin growing 57.7% annually in the last 5 years there is a strong correlation between the growth of HUT8. The chart shows the comparison between the performances of the two stocks. If BTC continues to follow this trend, then so will HUT's revenue.

coinbase

*In the past has partnered and loaned bitcoin to exchanged such as Coinbase so that they can sell to consumers and institutions.

- ❖ With the expansion of new mining capacity and energy through **high-performance hardware (ASICs)**, they've partnered and own stake in **American Bitcoin (ABTC)** to further **expand across the US**. Their goal is to transfer the responsibility of mining bitcoin to (ABTC) which they've set aside **\$265 million in Bitcoin-backed facilities** and focus on using their cash to create more data centers and energy/cost sustainability.

AMERICAN BTC

Thesis 2

US data center demand is forecast to grow by some 10 percent a year until 2030.

Data center power consumption, by providers/enterprises,¹ gigawatts

Data center power consumption, by providers/enterprises,¹ % share

This diversification strengthens HUT8's revenue and reduces dependency on Bitcoin and crypto price cycles meaning price swings.

Hut 8 is a Hyperscale data center, not using high amount of energy compared to others, yet producing results at a lower cost. They're considered to be in the same class as other hyperscale companies such as Meta, AWS, Oracle, and Google Cloud. Through the use of ASICs and growth in number of facilities across the US will those and other AI companies be interested in partnering for the use of energy beyond just their own.

HUT8 Corp. Leading Bitcoin Mining performer in industry while performing sustainability under long term growth

- ❖ **HUT8 has found a reusable energy system to cut that amount of energy being produced down compared to the typical amount**
 - The demand for computing services will only rise in the future but the amount of competition will decrease leading to HUT8 being a top performer and sustainable company.
- ❖ **HUT focuses on renewable energy that will lead to a more sustainable way to mine Bitcoin and run its data centers**
 - Through saving cost on data centers and being a sustainable company to mine bitcoin as well as other digital assets it allows them to use the saved revenue to continue its expansion in the US.

Top BTC Mining Companies FY 2024	Total Energy Consumption (MW)
HUT8	120
Riot Platforms	300
Marathon Digital	390
BitFarms	202
Clean Spark	114

We believe that HUT8 will outperform top Bitcoin mining companies in the digital asset industry by having clean energy systems. This will lead to an increase in digital asset revenue with an extreme increase in production mining.

Risk and Catalyst

Catalyst - Demand for High-Performance Data Center Rises

- ❖ With the demand for AI, computing and digital infrastructure on the rise, HUT8 data center come more valuable
- ❖ This confirms long term stability in the industry for investors

Catalyst – New government policies for clean Energy Systems

- ❖ New policies being made withing next few years forcing new HPC systems
- ❖ HUT8 to have advantage in their clean energy resources
- ❖ Shut down of data centers due to unsafe energy laws being passed

Catalyst – Institutional Adoption of Bitcoin

- ❖ Continued adoption of cryptocurrency being made into use for bank services and other corporations
- ❖ New Spot ETF's are being made
- ❖ Payment methods being used for modern day purchases using cryptocurrency

Risk – High Exposure to Bitcoin Price Volatility

- ❖ Can directly influence the companies' mining margins, asset values and financial stability
- ❖ Price of BTC decreases then the revenue from mining drops significantly while fixed cost such as energy and equipment depreciation remain high

Financial Summary

❖ Revenue Growth

- ❖ **Hybrid model** of Digital Asset Mining + Data Centers & AI Compute.
- ❖ **Bullish BTC Case** assumes BTC reaches **\$300k–\$450k by 2030**, driving mining revenue growth.
- ❖ **AI/Compute Case** assumes data center & HPC demand grows **20–25% CAGR**.
- ❖ **Combined Revenue Outlook**
- ❖ Mining revenue grows at **~30–35% CAGR (2024–2030)** in the Bullish BTC scenario.
- ❖ Data Centers & AI Compute revenue grows at **~20–22% CAGR**.
- ❖ **Blended revenue CAGR:**
 - **Bullish BTC:** ~34–36%
 - **AI Compute:** ~20–22%
 - **Result:**
 - Total revenue grows from **\$162M** in 2024 to:
 - ~\$983M by 2030 (Bullish BTC)
 - ~\$536M by 2030 (Data Centers & AI Compute)

❖ Cost Structure Assumptions

❖ Gross Margin

- ❖ GM expands as mining becomes more efficient and compute scales:
 - **55–60% GM target by 2030** (DC & AI scenario)
 - **50–55% GM target in Bullish BTC**

We expect both Bitcoin and Hut8 to outperform market expectations in the next 5 years

- ❖ With more institution adoption and demand for bitcoin, Hut 8 treasury and mining capabilities are going to be more sought after as supply of remaining bitcoin falls out of circulation.
- ❖ We also expect that their ability to offer data centers to other companies will put them in line with other competitors in the hyperscale market. Everyone needs computing energy and with the growing and expanding AI technology will that demand continue to grow.

The streets opinion on Bitcoin by 2030:

"ARK Invest (as of 2025) estimates a **bear / base / bull case** for Bitcoin in 2030 of roughly **US\$ 300,000 / US\$ 710,000 / US\$ 1.5 million**. Other public forecasts cite a more moderate 2030 price of about **US\$ 458,647**. Some bullish, high-risk estimates (less "institutional-base," more "moon-case") still suggest **US\$ 1 million+ by 2030**"

Our calculations for a bull case for their bitcoin mining and treasury would be if Bitcoin were to reach 300k in a bull market. While the street says 300k would be bearish! That means we could expect even more revenue than expected and growth of Hut8 in the next 5 years of holding.

Thank You
